About the course Building a Website with HTML CSS

Building a Website with HTML, CSS , in this course Building a Website with HTML, CSS" course, we will guide you through the foundational skills needed to create your first website. Starting with HTML (Hypertext Markup Language), you will learn how to structure a webpage by using tags, elements, and attributes. You will understand how to create headings, paragraphs, lists, links, images, and more. Once you have mastered the basics of HTML, weâ€™ll dive into CSS (Cascading Style Sheets) to style and layout your webpage. You will learn how to modify colors, fonts, margins, and align elements to create a visually appealing and user-friendly website. The course also covers responsive design techniques, ensuring your site looks great on all devices. Whether you are a beginner or looking to refine your web development skills, this course will provide you with the essential tools to start building your own website from scratch, with a focus on clean, efficient code and best practices.
