# About the course AI fundamentals for beginners

AI fundamentals, in this course provides a comprehensive introduction to the fundamentals of Artificial Intelligence (AI), designed for beginners and those curious about the field. Explore the key concepts of AI, including machine learning, neural networks, natural language processing, and computer vision. Learn how AI systems are designed, trained, and deployed to solve real-world problems. The course covers essential tools, algorithms, and frameworks used in AI development, with practical examples and hands-on projects to solidify your understanding. Understand the ethical considerations and societal impacts of AI, preparing you to navigate this rapidly evolving field. By the end of the course, youâ€™ll gain the foundational knowledge and skills needed to explore advanced AI topics or kickstart a career in artificial intelligence.

**Artificial Intelligence Category's Courses**

# Course Lesson(6)

Lesson 1 : **Understanding AI The Basics of Artificial Intelligence**

Lesson 2 : **The Turing Test Can Machines think**

Lesson 3 : **Machine Learning Explained A Quick Overview**

Lesson 4 : **Natural Language Processing Explained NLP Basics**

Lesson 5 : **Prompt Engineering Basics Enhance AI Communication**

Lesson 6 : **Deepfakes Explained The Rise of Digital Deception**
