About the course Object oriented Programming for beginners

Course Presenter : 0612 TV w NERDfirst

Object oriented Programming for beginners, in this course we will learn about the Object-Oriented Programming for Beginners Course, an essential guide to understanding and applying the core concepts of OOP. This course introduces foundational principles like Encapsulation, Inheritance, Polymorphism, and Abstraction, helping you build robust, reusable, and maintainable code. You'll explore how to create and work with Classes, Objects, and Methods, and understand the importance of object interactions in real-world applications. Designed for beginners, this course includes hands-on projects and examples in popular programming languages like Python, Java, or C++. By the end of the course, youâ€™ll have the confidence to design and develop your own object-oriented programs, setting a solid foundation for advanced software development. 0612 TV w NERDfirst

Programming Category's Courses

Course Lesson(8)

Lesson 1 : **Getting Started Object Oriented Programming 01**

Lesson 2 : **What s in a Class Object Oriented Programming 02**

Lesson 3 : **Data Hiding Object Oriented Programming 03**

Lesson 4 : **Homework Checkpoint Object Oriented Programming**

Lesson 5 : **Methods Object Oriented Programming 04**

Lesson 6 : **Static Members Object Oriented Programming 05**

Lesson 7 : **Inheritance Object Oriented Programming 06**

Lesson 8 : **More Inheritance Goodness Object Oriented Programming 07**
