About the course FFMPEG advanced techniques

Course Presenter : 0612 TV w NERDfirst

FFMPEG advanced, in this course we will learn about the FFMPEG Advanced Course, designed to deepen your understanding of FFMPEGâ€™s powerful capabilities for audio and video processing. The course covers advanced encoding techniques, including optimizing codecs like H.264 and H.265 for quality and efficiency. Youâ€™ll explore filters for video enhancement, such as stabilization, noise reduction, and color adjustments, as well as audio processing for mixing and synchronization. Topics include subtitle integration, batch processing, metadata editing, and live streaming setups using RTMP protocols. Additionally, youâ€™ll learn to leverage GPU acceleration for faster processing and scripting for automating tasks. By the end of this course, youâ€™ll master advanced FFMPEG commands and workflows, enabling you to handle complex multimedia projects with precision and efficiency. 0612 TV w NERDfirst

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **How to use FFMPEG**

Lesson 2 : **The PATH Variable Friday Minis 174**

Lesson 3 : **The Forfiles Command**

Lesson 4 : **FFMPEG Advanced Techniques Pt1 Advanced Filters**

Lesson 5 : **FFMPEG Advanced Techniques Pt2 Filtergraphs Timeline**

Lesson 6 : **Command Line Some applications**
