About the course CSS basics for beginners

Course Presenter : TutorialsPoint

CSS basics, in this course we will learn about the CSS Basics Course, designed to introduce the core concepts and techniques for styling websites using Cascading Style Sheets (CSS). Youâ€™ll explore essential topics such as selectors, properties, and values to define how elements are displayed. The course covers styling text, applying colors, adjusting layouts, and understanding the CSS box model. You'll also learn about positioning elements, working with backgrounds and borders, and creating simple animations. The course emphasizes practical, hands-on projects to help you apply what youâ€™ve learned, such as designing a basic webpage layout and making it visually appealing. By the end of the course, youâ€™ll have the foundational knowledge to confidently use CSS to enhance the look and feel of your websites, preparing you for more advanced web design and development topics.
