About the course Salesforce certified associate

Course Presenter : TutorialsPoint

Salesforce certified associate, in this course we will learn about the Salesforce Certified Associate Course, a comprehensive introduction to Salesforce for beginners. Designed for those new to Salesforce, this course covers the foundational concepts of Salesforce CRM, including navigating the Lightning Experience, understanding Salesforce objects like accounts, contacts, and opportunities, and managing data effectively. Youâ€™ll learn to create custom reports and dashboards, explore data security principles, and understand the basics of Salesforce automation and workflows. The course also introduces integration options and provides hands-on practice with real-world scenarios. By the end, youâ€™ll be well-prepared to take the Salesforce Certified Associate exam, equipping you with the skills to leverage Salesforce for business success and laying the foundation for advanced Salesforce certifications.
