About the course Power BI basics for beginners

Course Presenter : Learnit Training

Power BI basics, in this course we will learn about the Power BI Basics course and explore how to use this powerful data visualization and business intelligence tool. Designed for beginners, the course covers essential features like importing data, creating dynamic dashboards, and building interactive reports. Youâ€™ll learn to connect to various data sources, use Power Query for data transformation, and leverage visualizations to uncover insights. This course also introduces key concepts like DAX (Data Analysis Expressions) and sharing reports through the Power BI Service. By the end, youâ€™ll have the foundational skills needed to analyze and present data effectively using Power BI. Learnit Training
