About the course Advanced SQL for data analytics

Course Presenter : Data with Baraa

Advanced SQL for data analytics, in this course we will learn about the Advanced SQL for Data Analytics techniques needed to handle complex data scenarios. This course is designed to enhance your ability to analyze large datasets, extract insights, and optimize query performance. You will explore advanced topics such as subqueries, Common Table Expressions (CTEs), and window functions like RANK, ROW_NUMBER, and PARTITION BY. Additionally, youâ€™ll master techniques for handling multi-table joins, recursive queries, and dynamic SQL. The course also covers performance tuning strategies, using indexes, and optimizing query execution. By the end of this course, you will have the skills to tackle real-world data challenges, create efficient SQL queries, and derive actionable insights from complex datasets with confidence. Perfect for aspiring data analysts or professionals looking to advance their SQL expertise Data with Baraa
