About the course Tableau Functions and calculations

Course Presenter : Data with Baraa

Tableau Functions and calculations, in this course we will learn about the Tableau Functions and Calculations, essential tools for dynamic data analysis and advanced visualizations. This course covers a wide range of functions, including numeric, string, date, and logical functions, enabling you to manipulate data efficiently. Youâ€™ll explore aggregate calculations like SUM and AVG, along with advanced table calculations such as RANK and RUNNING_SUM. The course delves into Level of Detail (LOD) expressions, allowing for precise control over data granularity. Additionally, you'll learn how to create dynamic parameters, custom fields, and apply conditional formatting. With hands-on exercises, youâ€™ll practice building calculations to solve real-world business problems, from analyzing trends to generating forecasts. By the end of this course, youâ€™ll master Tableauâ€™s powerful calculation capabilities, enhancing your ability to create insightful dashboards and drive data-driven decisions effectively. Perfect for beginners and advanced users alike. Data with Baraa
