# About the course Tableau dashboards for beginners

### Course Presenter : Data Tutorials

Tableau dashboards, in this course we will explore how to create interactive and visually compelling dashboards using Tableau. Youâ€™ll learn the fundamentals of designing dashboards, combining multiple visualizations, and organizing data effectively to tell a cohesive story. Weâ€™ll cover advanced features such as using filters, parameters, and actions to make dashboards dynamic and user-friendly. Additionally, youâ€™ll discover how to integrate data from multiple sources, optimize dashboard performance, and design layouts that cater to various audiences. Whether youâ€™re a beginner or looking to enhance your skills, this course will guide you through creating professional dashboards that provide valuable insights, drive informed decisions, and make your data presentations stand out.
