About the course Excel Power Pivot for beginners

Course Presenter : Innozant

Excel Power Pivot, in this course we will learn about the Excel Power Pivot course, a powerful tool for managing, analyzing, and visualizing large datasets efficiently. Power Pivot enhances Excelâ€™s capabilities by allowing users to create robust data models, perform advanced calculations with DAX (Data Analysis Expressions), and manage relationships between multiple tables. You will explore how to build interactive dashboards, automate data analysis processes, and handle complex data transformations. Whether youâ€™re a beginner or looking to deepen your skills, this course covers essential techniques and practical applications for professionals in finance, marketing, or data-driven fields. Gain hands-on experience with step-by-step instructions and real-world examples, empowering you to maximize Excelâ€™s potential with Power Pivot and deliver impactful insights. Innozant

Computer Softwares Category's Courses

Course Lesson(10)

Lesson 1 : **Introduction to Power Pivot for Excel**

Lesson 2 : **Power Pivot Explained Installation Importing Data to Power Pivot**

Lesson 3 :
Power Pivot RELATED Function Vlookup Replacement Relationship and Import Folder Data

Lesson 4 : **Creating a data Model and Relationships in Power Pivot**

Lesson 5 : **Import Large and Compression in Power Pivot Reduce File Size using Power Pivot**

Lesson 6 :
Power Pivot Import Folder Import Use Power Query Feature to import Folder Data into Power Pivot

Lesson 7 : **Introduction To Dax Function Power Pivot Dax Measures**

Lesson 8 : **DAX Sum vs SumX Function**

Lesson 9 : **Power Pivot DAX Function Average Averagea AverageX**

Lesson 10 : **Dax Guide Count CountA CountX CountAX**
