# About the course Practice C Programming

An array is defined as the collection of similar type of data items stored at contiguous memory locations. Arrays are the derived data type in C programming language which can store the primitive type of data such as int, char, double, float, etc.

**Programming Category's Courses**

# Course Lesson(10)

Lesson 1 : **1 C Programming Question Practice Hello World**

Lesson 2 : **2 C Programming Question Practice Calculator Program**

Lesson 3 : **3 C Programming Question Practice Print Integers from 1 to 100**

Lesson 4 : **4 C Programming Questions Practice Print Table 2 3 4 5 6 7 8 9 10**

Lesson 5 : **5 C Programming Questions Practice Print Reverse Table 2 3 4 5 6 7 8 9 10**

Lesson 6 : **6 C Programming Questions Practice How to Check Odd or Even Number**

Lesson 7 : **7 C Programming Questions Practice Print Odd or Even Number From 1 to 100**

Lesson 8 :
**8 C Programming Questions Practice Print Table 2 3 4 5 6 7 8 9 10 Together in Single Console**

Lesson 9 : **9 C Programming Questions Practice Swapping Of Two Numbers**

Lesson 10 :
**10 C Programming Questions Practice Swapping Of Two Numbers Without Using Third Variable**
