About the course Google tag assistant for website tracking

Course Presenter : Umar Tazkeer

Google tag assistant, in this course we will learn about the Google Tag Assistant tool, its features, and how to use it for website tracking and debugging. Google Tag Assistant is an essential Chrome extension that helps verify, troubleshoot, and optimize Google tags like Google Analytics, Google Ads, and Google Tag Manager. We'll explore how to install and configure the extension, analyze tracking issues, and improve tag implementation for accurate data collection. Through practical examples, you'll learn how to audit your websiteâ€™s tags, identify common errors, and ensure seamless integration of tracking codes. This course is perfect for marketers, analysts, and developers who want to enhance their tracking accuracy and website analytics. Whether you're a beginner or an experienced user, this course will provide step-by-step guidance to mastering Google Tag Assistant and optimizing your web tracking strategies effectively. Umar Tazkeer
