About the course Build E Commerce website using HTML

Course Presenter : Great Learning

Build E-Commerce website using HTML, in this course we will learn about building an E-Commerce website using HTML, covering the essential steps to create a functional and visually appealing online store. You'll start by designing a structured layout using HTML5, adding key elements like product listings, navigation menus, shopping cart sections, and contact forms. The course focuses on semantic HTML, proper structuring, and best practices for accessibility. By the end, you will have built a fully structured e-commerce website, gaining the foundational knowledge needed for front-end development. Perfect for beginners looking to enter web development and create their own online store. Great Learning
