Mindluster Platform

About the course Python for data science Projects

Course Presenter : Great Learning

Python for data science Projects, in this course you'll learn how to apply Python in real-world data science projects. Master essential libraries like Pandas, NumPy, Matplotlib, and Scikit-Learn to analyze, visualize, and model data effectively. Explore hands-on projects in data cleaning, exploratory data analysis (EDA), and machine learning. Understand data preprocessing, feature engineering, and model evaluation techniques. Learn to work with real datasets and automate data workflows using Python. By the end of the course, you'll be able to build end-to-end data science projects, gaining practical skills to solve real-world business problems using Python. Great Learning

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Data science projects in 2022 Data Science projects in Python Great Learning**

Lesson 2 :
Bank Transaction Fraud Detection with Data Science Fraud Detection using Machine Learning

Lesson 3 : **Used Smartphone Price Prediction Data Science Tutorial Great Learning**

Lesson 4 :
Face detection with OpenCV in Python OpenCV Python Tutorial for Beginners in 2021 Great Learning

Lesson 5 : **Stock Price Prediction using Deep Learning Deep Learning Tutorial Great Learning**

Lesson 6 : **Multivariate Time Series on COVID 19 Time Series Forecasting Great Learning**
