About the course Data Science with Python for beginners

Course Presenter : Great Learning

Data Science with Python, in this course we will learn about Data Science with Python, covering data analysis, visualization, machine learning, and statistical modeling. You will explore key Python libraries like Pandas, NumPy, Matplotlib, and Scikit-Learn to manipulate and analyze data efficiently. Learn how to preprocess data, build predictive models, and derive insights from datasets using real-world applications in finance, healthcare, and business. The course includes hands-on projects to strengthen practical skills in data cleaning, feature engineering, and model evaluation. Whether youâ€™re a beginner or looking to advance your expertise, this course provides a structured approach to mastering data science using Python. Great Learning

Computer Science Category's Courses

Course Lesson(7)

Lesson 1 :
Python for Data Science Full Course Data Science Tutorials for Beginners in 2022 Great Learning

Lesson 2 :
EDA with Python Full Course in Hindi Exploratory Data Analysis EDA Using Python Great Learning

Lesson 3 : **Exploratory Data Analysis Tutorial Basics of EDA with Python Great Learning**

Lesson 4 : **Numpy Python Tutorial Python for beginners Python tutorial Great Learning**

Lesson 5 :
Pandas Python tutorial Python Tutorial for Beginner Python Programming Great Learning

Lesson 6 : **Data Visualization Tutorial Tableau PowerBI Matplotlib Seaborn Great Learning**

Lesson 7 : **Data Science with Python Full Course 2022 Python for Data Science Great Learning**
