Mindluster Platform

About the course JS Validazione Form

Hands down, JavaScript is undeniably better than Python for website development for one simple reason: JS runs in the browser while Python is a backend server-side language. While Python can be used in part to create a website, it can't be used alone. JavaScript is the better choice for desktop and mobile websites.

Programming Category's Courses

Course Lesson(4)

Lesson 1 : **1 Javascript Esempi Pratici Validazione Form**

Lesson 2 : **2 Javascript Esempi Pratici JSON AJAX**

Lesson 3 : **3 Javascript Esempi Pratici Date**

Lesson 4 : **Creare grafici in 10 minuti con ChartJS**
