About the course Ultrasound guided peripheral nerve block

Course Presenter : Art of Regional Anesthesia and Pain Management

Ultrasound-guided peripheral nerve block, in this course we will learn about Ultrasound-guided peripheral nerve block course, focusing on the principles and practical techniques of performing nerve blocks with real-time ultrasound guidance. This course is designed for healthcare professionals aiming to enhance their skills in regional anesthesia. You will explore the sonoanatomy of key nerve structures, learn how to identify target nerves, visualize needle advancement, and safely inject anesthetic agents. Emphasis will be placed on upper and lower limb blocks, brachial plexus, femoral, sciatic, and other peripheral nerves. Through clinical videos, hands-on simulations, and case discussions, you'll gain confidence in applying ultrasound-guided nerve blocks in diverse clinical settings.
