About the course Wireshark filters fundamentals

Course Presenter : Cyberwings Security

Wireshark filters, in this course we will learn about Wireshark filtersâ€”both display filters and capture filtersâ€”to help you isolate the exact network traffic you need to see. Youâ€™ll gain hands-on experience creating and applying filters to analyze protocols like TCP, UDP, HTTP, DNS, and more. Whether you're troubleshooting a slow network, detecting security threats, or analyzing packet behavior, filters are key to saving time and focusing on what matters. Through real-world examples and guided labs, you'll master writing advanced filter expressions and using Wireshark like a pro. This course is ideal for network administrators, cybersecurity professionals, and IT students looking to sharpen their packet analysis skills. Join now and take your Wireshark skills to the next level. Cyberwings Security
