Mindluster Platform

About the course Tradomate AI

Course Presenter : Financial Programming with Ritvik CFA

Tradomate AI, in this course you'll learn how to navigate the Tradomate AI platform, design intelligent bots using a drag-and-drop visual builder, and connect to popular exchanges like Binance and MetaTrader. You'll explore technical indicators such as RSI, MACD, and Moving Averages, and learn how to build strategies based on them. We'll cover how to backtest strategies with historical data, set up risk management rules like stop-loss and take-profit, and monitor bot performance in real-time. This course is perfect for beginners and traders looking to automate their ideas using AI-powered tools. By the end, you'll be able to confidently use Tradomate AI to launch your own bots and manage trades automatically. Letâ€™s begin your journey into the world of no-code trading automation with Tradomate AI Financial Programming with Ritvik CFA

Computer Science Category's Courses
