About the course Pine script basics

Course Presenter : The Art of Trading

Pine script basics, in this course Start the Pine Script Basics Course and learn how to create your own custom trading indicators and strategies on TradingView. In this course, we will explore the fundamentals of Pine Script, TradingViewâ€™s native programming language used by traders and developers to analyze market data and automate trading signals. You'll learn how to write your first script, plot data on charts, use built-in functions, and apply conditional logic to build alerts and backtest strategies. Whether youâ€™re a beginner in coding or new to technical analysis, this course will guide you step-by-step through the essential concepts, from variables and functions to customizing visual outputs. By the end of the course, youâ€™ll be able to write simple but powerful scripts that can enhance your trading decisions and save you time. Join now and take your first step into the world of algorithmic trading with Pine Script on TradingView. The Art of Trading
