About the course Pine script strategies

Course Presenter : The Art of Trading

Pine script strategies, in this course learn how to build, test, and optimize trading strategies using Pine Script on TradingView. In this course, we will explore how to turn your trading ideas into fully functional scripts that can be backtested and visualized directly on charts. Youâ€™ll learn the difference between indicators and strategies, how to use built-in functions, plot buy and sell signals, set stop-loss and take-profit levels, and analyze the performance of your strategy. Step by step, weâ€™ll guide you through coding logic for popular strategies like moving average crossovers, RSI-based entries, and multi-timeframe filters. Whether you're a beginner or intermediate trader, this course will give you the tools to create rules-based strategies and confidently test them with real market data. By the end, you'll be able to design, refine, and automate your trading ideas using the full power of Pine Script. Join now and start turning strategy into code. The Art of Trading
