About the course Figma components essentials

Course Presenter : TD Sunshine

Figma components essentials, in this course we will learn how to build, manage, and apply Figma components to create consistent, scalable design systems. Youâ€™ll explore how to create master components and instances, understand the power of nesting, and apply variants to build dynamic elements like buttons, toggles, and input fields. We'll also cover how to keep your components organized for efficient collaboration and how to integrate them into shared libraries. Whether you are a beginner or refreshing your skills, this course provides the essential knowledge to streamline your design workflow and maintain consistency across all your projects. Unlock the full potential of Figma by learning how to design smart, responsive interfaces using component-based design. Letâ€™s begin the journey to mastering Figma Components Essentials.
