About the course Web design basics

Course Presenter : DesignWithArash

Web design basics, in this course we will learn the fundamental principles and practices of modern web design. Youâ€™ll explore the building blocks of effective websites, including layout, typography, color theory, spacing, and visual hierarchy. Weâ€™ll guide you through creating wireframes, understanding responsive design, and applying UI/UX concepts that enhance user experience. The course introduces essential tools such as Figma or Adobe XD for design and HTML/CSS for implementation. Youâ€™ll also learn how to design with accessibility and performance in mind, ensuring your websites are user-friendly and functional across all devices. By the end of this course, youâ€™ll be equipped with the knowledge to plan, design, and present clean, modern web interfaces from scratch. Whether you're a complete beginner or looking to strengthen your foundation, this course will help you build the confidence and skills needed for your web design journey. DesignWithArash
