About the course Figma mobile UI design essentials

Course Presenter : Mavi Design

Figma mobile UI design, in this course we will learn how to design modern, user-friendly mobile interfaces using Figma. From concept to final design, you'll explore the full mobile UI workflow including wireframing, creating reusable components, applying consistent styles, and designing screens for both iOS and Android. The course covers best practices for layout, spacing, color, and typography, as well as how to use auto layout, variants, and constraints to create scalable and responsive designs. Youâ€™ll also learn to prototype interactive flows, test user experiences, and prepare your designs for developer handoff. Whether you're building a chat app, e-commerce interface, or dashboard, this course provides hands-on experience to help you design beautiful and functional mobile UIs in Figma. By the end of the course, youâ€™ll be equipped with the skills to confidently create polished mobile designs that are ready for real-world use.
