About the course Figma component properties

Course Presenter : Mavi Design

Figma component properties, in this course we will learn about Figma Component Properties and how they revolutionize the way we build design systems. Component Properties in Figma allow designers to create more flexible, reusable, and customizable components. Youâ€™ll explore how to use text, boolean, and instance swap properties to simplify your workflows, minimize component variants, and empower team collaboration. We will start with the basics of creating components and gradually move into advanced techniques like nesting components, adding interactive elements, and leveraging properties to make components dynamic and user-friendly. Whether you're designing UI kits, building prototypes, or maintaining design systems, mastering component properties will save time and make your designs more scalable. By the end of the course, you'll be equipped with the knowledge to create smarter components that adapt to a variety of design needs with ease. Mavi Design
