About the course Loading wheel animation in after effects

Course Presenter : Mavi Design

Loading wheel animation in after effects, in this course we will learn about Loading Wheel Animation in After Effects. This course is designed to help you create smooth, professional, and eye-catching loading animations that are widely used in apps, websites, and digital interfaces. You will begin by learning how to create circular shapes using the Ellipse Tool, customize the stroke settings, and use the Trim Paths feature to control the visibility of your wheel. Then, you will animate the rotation to make your loader spin smoothly and loop infinitely using simple expressions like loopOut(). Throughout the course, you'll also explore how to add motion blur, easing, and style enhancements for a polished final look. Whether you are a beginner in motion graphics or a UI/UX designer looking to add micro-interactions to your interfaces, this course will guide you step by step in building versatile and customizable loading animations. By the end, youâ€™ll have a reusable animation that fits any modern design. Mavi Design
