About the course Design Pie charts in figma

Course Presenter : Mavi Design

Design Pie charts in figma, in this course we will learn about Design Pie Charts in Figma. Youâ€™ll explore how to visually represent data using pie charts, one of the most popular data visualization tools. We'll start by learning how to create pie charts manually using Figmaâ€™s vector and shape tools, then move on to customizing colors, labels, percentages, and segment sizing. Youâ€™ll also discover techniques to design both static and interactive-style charts for dashboards or presentations. The course covers best practices for readability, color selection, and responsive design when using charts in user interfaces. Whether you're building UI dashboards, infographics, or client presentations, this course gives you the skills to make your data both clear and beautiful. By the end, youâ€™ll be confident in designing professional, clean, and customizable pie charts that enhance any digital or print projectâ€”all using Figmaâ€™s powerful and flexible design tools.
