About the course Create Animals icon in figma

Course Presenter : Mavi Design

Create Animals icon in figma, in this course we will learn about creating animals icons in Figma. Youâ€™ll explore how to design cute, simple, and scalable animal-themed icons like cats, dogs, birds, or fish using Figmaâ€™s powerful shape and vector tools. Weâ€™ll start by sketching basic outlines with the Ellipse, Rectangle, and Pen tools, then refine them with curves, Boolean operations, and smart alignment to bring the animal shapes to life. Youâ€™ll also learn how to stylize your icons using fills, strokes, gradients, and minimal detailing to maintain clarity even at small sizes. The course also introduces best practices for icon consistency, such as maintaining uniform line weight and using a limited color palette. Whether youâ€™re designing for educational apps, childrenâ€™s content, or playful UI designs, this course will guide you through the process of creating clean and expressive animal icons. By the end, youâ€™ll be able to build your own icon set or integrate animal icons into any design project with confidence. Mavi Design
