

## About the course Xcode UI design for beginners

**Course Presenter : CodeWithChris**

Xcode UI design, in this course we will learn how to design user interfaces for iOS applications using Apple's Xcode IDE. You'll explore both Interface Builder (Storyboard) and SwiftUI to build layouts, add buttons, images, labels, and more. We'll cover how to use Auto Layout to make your designs responsive across all device sizes and how to connect your interface to Swift code using IBOutlets and IBActions. You'll also learn about stack views, navigation controllers, tab bars, and dynamic interface updates. Whether you're a complete beginner or transitioning from other platforms, this course provides step-by-step instruction to help you master UI design in Xcode. By the end, you'll be able to confidently build beautiful, interactive interfaces for iOS apps and bring your app ideas to life with a professional look and feel. CodeWithChris
