About the course Testing in iOS fundamentals

Course Presenter : CodeWithChris

Testing in iOSm in this course gain essential skills to build reliable and bug-free iOS applications. In this course, we will learn about Testing in iOS from the ground up, exploring unit testing, UI testing, and test-driven development (TDD) using Swift and XCTest. You'll understand how to structure your code for testability, write test cases that catch bugs early, and automate your testing process for efficiency. Weâ€™ll dive into mocking, stubbing, and dependency injection to isolate and verify functionality, and explore Xcodeâ€™s built-in tools to run and manage tests. By the end of this course, youâ€™ll be confident in building robust apps with a strong testing foundation, ensuring your code is clean, maintainable, and scalable. Whether you're a beginner in iOS development or looking to level up your testing skills, this course will equip you with the techniques and confidence to master testing in iOS. Letâ€™s begin the Testing in iOS course. CodeWithChris

Web Design Category's Courses

Course Lesson(5)

Lesson 1 : **Getting Started with Unit Testing in iOS Unit Testing Part 1**

Lesson 2 : **Writing a Simple Unit Test Unit Testing Part 2**

Lesson 3 : **Mocking a Network Request Unit Testing Part 3**

Lesson 4 : **Writing the Unit Test Unit Testing Part 4**

Lesson 5 : **Test Driven Development Unit Testing Part 5**
