About the course Figma components and variants

Course Presenter : Flux Academy

Figma components and variants, in this course master the essential tools for building efficient, scalable design systems. In this course, we will learn about Figma components and variants course in depth, focusing on how to create reusable elements that streamline your design process. Youâ€™ll discover how to build buttons, cards, modals, and other UI elements as components, and then use variants to manage multiple states (like hover, active, or disabled) within a single, organized structure. Weâ€™ll explore best practices for naming, structuring, and updating components across large projects, ensuring consistency and saving valuable time. Youâ€™ll also learn how to use interactive components to simulate real app behavior during prototyping. By the end of this course, youâ€™ll be able to create clean, maintainable Figma files that elevate collaboration with developers and speed up your workflow. Letâ€™s begin the Figma Components and Variants course and build smarter, faster design systems. Flux Academy
