About the course Essential skills for web designers

Course Presenter : Flux Academy

Essential skills for web designers, in this course we will learn about the essential skills every web designer needs to create effective, user-friendly, and visually appealing websites. Weâ€™ll begin by covering the basics of layout, color theory, typography, and visual hierarchyâ€”key principles that shape how content is perceived and navigated. Then, weâ€™ll explore responsive design techniques to ensure your layouts adapt seamlessly across devices. Youâ€™ll also learn how to use design tools like Figma or Adobe XD for creating wireframes and high-fidelity mockups. The course introduces core HTML and CSS concepts to help you better communicate with developers or even prototype your own websites. Weâ€™ll also touch on user experience (UX), accessibility best practices, and performance considerations. Whether you're a beginner or refining your design process, this course provides a solid foundation in the visual and technical skills required to succeed in the world of web design. Flux Academy
