About the course Make Scrollable Prototypes in figma

Course Presenter : Flux Academy

Make Scrollable Prototypes in figma, in this course we will learn about how to make scrollable prototypes in Figma. Scrollable prototypes are essential for simulating real user experiences in web and mobile design. Youâ€™ll start by understanding frames and how to set up vertical, horizontal, or both scrolling behaviors. Weâ€™ll walk through designing screens with content that exceeds the visible area and configuring Figma to allow users to scroll through it during prototype previews. Youâ€™ll also learn how to work with nested scrollable areas, sticky headers, and how to use overflow settings effectively. This course will also teach you best practices for using scrolling in UI/UX design to improve usability and user flow. Whether you're designing landing pages, apps, or dashboards, scrollable prototypes bring your ideas to life and help clients and developers understand the full user journey. By the end of the course, youâ€™ll be confident in building dynamic, scrollable prototypes that reflect real-world interaction. Flux Academy

Web Design Category's Courses

Course Lesson(285)

Lesson 1 : **How to set goals for 2024**

Lesson 2 : **How to make type look dishonest**

Lesson 3 : **Christmas Gift ideas for Designers**

Lesson 4 : **Free resource for new designers**

Lesson 5 : **What will you be doing in ten years time**

Lesson 6 : **Great portfolio tips Slides Agency**

Lesson 7 : **Great portfolio tips Michael Jhenein**

Lesson 8 : **Same words different message**

Lesson 9 : **recraft ai Ai Tool for Vector Icons in Web Design**

Lesson 10 : **Best resource for animation GSAP**
