About the course Webflow for beginners

Course Presenter : Flux Academy

Webflow for beginners, in this course we will learn about Webflow for beginners and how to build professional websites without writing a single line of code. Webflow combines the power of a visual editor with HTML, CSS, and JavaScript under the hoodâ€”making it perfect for designers who want full control over their siteâ€™s design and layout. Youâ€™ll begin by exploring Webflowâ€™s interface, learning how to structure pages using containers, sections, grids, and flexbox. Weâ€™ll walk through adding and styling text, images, buttons, and navigation menus. The course also covers responsive design principles so your site looks great on any screen size, as well as Webflowâ€™s interactions and animations for dynamic effects. Youâ€™ll create and publish a complete multi-page website, learning how to manage hosting, SEO settings, and custom domains. Whether youâ€™re new to web design or transitioning from static tools, this course gives you everything you need to confidently build and launch your first website with Webflow. Flux Academy
