About the course Spring 6 and spring boot

Course Presenter : Telusko

Spring 6 and spring boot, in this course we will learn about Spring 6â€™s latest features, including its full support for Jakarta EE, improved modular architecture, and enhanced security. Youâ€™ll explore how Spring Boot simplifies project setup with auto-configuration, embedded servers, and minimal XML. This course covers essential topics like dependency injection, creating RESTful APIs, working with databases using Spring Data JPA, and handling exceptions and validations. Youâ€™ll also build real-world projects to practice key concepts and deploy applications using Maven and Spring Boot CLI. Whether youâ€™re a beginner or looking to update your skills to the latest version of Spring, this course provides a hands-on path to mastering enterprise-level development. Start the Spring 6 and Spring Boot Course today and unlock the power of modern Java development. Telusko
