About the course Installing wordPress on Siteground

Course Presenter : SiteGround com

Installing wordPress on Siteground, in this course we will learn how to set up a WordPress website using SiteGroundâ€™s powerful Site Tools dashboard. Youâ€™ll go step by step through the process of accessing your SiteGround account, navigating to the WordPress installer, and completing the installation with a custom domain. The course covers how to configure essential settings such as site title, admin username, password, and email. You'll also learn how to enable SSL, choose the right installation path, and manage your WordPress files and databases from Site Tools. Whether you're creating a personal blog, portfolio, or business website, this course equips you with the skills to get your site live quickly and securely. By the end, youâ€™ll confidently understand how to install, access, and start building your WordPress site on SiteGroundâ€”no technical background required. This course is ideal for beginners and anyone seeking a fast and reliable hosting setup for WordPress. SiteGround com
