

# About the course **Python**

**Course Presenter : Python**

Python is a high-level, interpreted, general-purpose programming language. It is designed to be easy to learn and use, and it has a large and active community. Python is used in a wide variety of applications, from web development to data science. The course covers the basics of Python, including variables, data types, control flow, and functions. It also covers more advanced topics such as classes, modules, and packages. The course is designed for beginners and is suitable for anyone who wants to learn Python.

**Programming Category's Courses**

## Course Lesson(20)

Lesson 1 : **Python**

Lesson 2 : **Python**

Lesson 3 : **Python**

Lesson 4 : **Python**

Lesson 5 : **Python**

Lesson 6 : **Python**

Lesson 7 : **Python**

Lesson 8 :
