# About the course Powerâ€¯BI metrics fundamentals

### Course Presenter : Jason Davidson Power BI

Powerâ€¯BI metrics, in this course we will learn about Powerâ€¯BI metrics course. Power BI is a powerful business analytics tool that helps organizations visualize data and share insights across teams. This course focuses on teaching you how to create, manage, and analyze key metrics that drive business decisions. You will explore how to design effective Key Performance Indicators (KPIs) and custom metrics using Power BIâ€™s versatile tools. The course covers data modeling techniques, DAX formulas for advanced calculations, and how to build interactive dashboards that highlight your metrics clearly. Additionally, you will learn to implement time intelligence metrics, set up real-time data monitoring, and optimize report performance. By mastering these Power BI metrics skills, you can transform raw data into actionable insights, enabling better strategic planning and decision-making for your organization. Jason Davidson Power BI

**Computer Science Category's Courses**

# Course Lesson(6)

Lesson 1 :
**Mini Course Pt1 How to Use Power BI Metrics to Quickly Create a Maintenance KPI Balanced Scorecard**

Lesson 2 :
**Mini Course Pt2 Use Power BI Metrics Power Automate to Trigger Email Teams KPI Warning Alerts**

Lesson 3 :
**Mini Course Pt3 Power BI Metrics Use Power Automate to Create Teams Message When Check Ins Added**

Lesson 4 : **How to Add METRIC Check in NOTES As Narratives in POWER BI REPORTS**

Lesson 5 :
**Add Metric Notes to Power BI Reports Pt2 Using Power Automate to Refresh Scorecard Dataset**

Lesson 6 :
**QT 81 How to Configure the Time Period Cycle Over Comparison Values in Power BI Metrics**
