Mindluster Platform

About the course Laravel 12 react crud

Course Presenter : Tony Xhepa

Laravel 12 react crud, we will learn about Laravel 12 React CRUD course, starting from setting up the development environment to building a complete full-stack CRUD application from scratch. You will begin by mastering Laravel 12 as the backend framework, creating a RESTful API with routing, controllers, models, migrations, and validations. Then, we will move to React for the frontend, learning how to set up components, manage state, use React Router, and integrate Axios for API communication. You will build Create, Read, Update, and Delete operations with clean and reusable code, implement authentication, and handle form submissions with proper error handling. We will also cover file uploads, pagination, and UI enhancements for better user experience. By the end of this Laravel 12 React CRUD course, you will have the skills to develop scalable, interactive applications ready for deployment in real-world projects. Tony Xhepa
