About the course Laravel Livewire CRUD with file upload

Course Presenter : Tony Xhepa

Laravel Livewire CRUD with file upload, in this course we will learn about Laravel Livewire CRUD with File Upload course, starting from setting up the development environment to building a dynamic CRUD application with seamless file upload functionality. You will begin by mastering Laravel for backend development, creating migrations, models, controllers, and validations. Then, we will integrate Livewire to build interactive components that handle Create, Read, Update, and Delete operations without full page reloads. You will learn how to use the WithFileUploads trait in Livewire to manage file uploads, validate file types and sizes, store them securely, and display uploaded files in the UI. We will also cover advanced features like multiple file uploads, image previews, and real-time validation feedback. By the end of this Laravel Livewire CRUD with File Upload course, you will be able to develop professional, responsive, and user-friendly applications with efficient data and file management. Tony Xhepa
