About the course Laravel statamic

Course Presenter : Tony Xhepa

Laravel statamic, in this course we will learn about Laravel Statamic course, starting from the basics of installing and configuring Statamic to building fully functional and dynamic websites powered by Laravelâ€™s backend. You will begin by setting up a Laravel project and integrating Statamic as the CMS, learning its control panel, content structures, and template system. We will cover creating collections, taxonomies, and blueprints to organize and manage content efficiently. You will also learn how to develop and customize Statamic themes, implement Antlers templating, and work with global variables, assets, and navigation menus. We will explore creating and managing forms, adding dynamic content blocks, and building multi-language websites. Advanced lessons will include creating custom Statamic addons, optimizing performance, and deploying your Statamic-powered Laravel site. By the end of this course, you will be able to build professional, scalable, and customizable websites using Laravel and Statamic. Tony Xhepa
