About the course Laravel multi language

Course Presenter : Tony Xhepa

Laravel multi-language, in this course Laravel Multi-Language course is designed to teach you how to add multi-language support to your Laravel applications, making them accessible to a wider audience. In this course, we will learn about Laravelâ€™s localization features, setting up language files, and organizing translations efficiently. You will explore using helper functions like __() and trans() to display dynamic translated content in Blade templates. We will cover how to switch languages dynamically, store and retrieve user language preferences, and localize routes, dates, and times. Youâ€™ll also learn about using JSON translation files for simpler key-based translations and integrating multi-language support into forms and validation messages. By the end of this course, you will be able to create fully localized Laravel applications, ensuring your projects are user-friendly for multiple languages and culturally diverse audiences. Tony Xhepa
