About the course Installing filament PHP v3 in laravel

Course Presenter : Tony Xhepa

Installing filament PHP v3 in laravel, in this course Installing Filament PHP v3 in Laravel course is designed to guide you through the complete process of setting up Filament, a modern and elegant admin panel for Laravel applications. In this course, we will learn about the requirements for Filament PHP v3, how to install it via Composer, and configure it for your Laravel project. You will explore the initial setup, including publishing configuration files, running migrations, and creating an admin user. We will cover how to access and navigate the Filament admin dashboard, manage authentication for admins, and customize basic settings. Additionally, weâ€™ll discuss best practices for organizing resources, preparing your Laravel app for Filament, and ensuring smooth integration with existing features. By the end, you will be fully prepared to start building powerful admin interfaces using Filament PHP v3 in your Laravel projects. Tony Xhepa

Programming Category's Courses
