About the course Laravel splade employees management

Course Presenter : Tony Xhepa

Laravel splade employees management, in this course Laravel Splade Employees Management course is designed to teach you how to build a complete employee management system using Laravel Splade, a modern tool that combines Laravel Blade, Vue.js, and SPA-like features without complex JavaScript. In this course, we will learn how to set up Laravel Splade, create the employee model, migration, and controller, and implement full CRUD operations for managing employee records. You will explore how to handle form submissions, apply validation, and manage file uploads such as employee photos. We will cover searching, filtering, and paginating employee lists, as well as assigning roles and permissions for secure access control. Additionally, you will learn how to use Splade modals, tables, and dynamic UI components to create a smooth and interactive experience. By the end of the course, you will have the skills to develop a robust, user-friendly employee management system powered by Laravel Splade. Tony Xhepa
