About the course Vue authentication with laravel breeze API

Course Presenter : Tony Xhepa

Vue authentication with laravel breeze API, in this course Vue Authentication with Laravel Breeze API course is designed to teach you how to build a secure authentication system for a Vue.js frontend powered by a Laravel backend using Laravel Breeze in API mode. In this course, we will learn how to set up Laravel Breeze with Sanctum for SPA authentication, configure API routes, and connect them to a Vue application. You will explore creating login, registration, and logout functionality, protecting routes on both the backend and frontend, and managing authentication state with tools like Pinia or Vuex. We will cover handling form validation errors, retrieving authenticated user data, and implementing password reset flows. Additionally, youâ€™ll learn best practices for securing API endpoints and structuring your Vue app for clean, maintainable code. By the end of the course, you will have a fully functional Vue + Laravel Breeze API authentication system ready for production deployment. Tony Xhepa
