About the course Laravel Filament roles

Course Presenter : Tony Xhepa

Laravel Filament roles, in this course Laravel Filament Roles course is designed to teach you how to implement and manage role-based access control in a Laravel application using the Filament admin panel. In this course, we will learn how to install and configure the Spatie Laravel Permission package, create and manage roles within Filament, and assign them to users through the admin interface. You will explore how to protect Filament resources, pages, and actions based on user roles, ensuring that only authorized users can access specific areas. We will cover customizing the Filament UI to dynamically show or hide elements depending on the logged-in userâ€™s role. Additionally, you will learn best practices for structuring roles in large applications, using middleware for route protection, and testing your role-based access system. By the end of this course, you will have the skills to build secure, role-driven applications with Laravel and Filament. Tony Xhepa

Programming Category's Courses

Course Lesson(13)
