About the course Laravel Splade

Course Presenter : Tony Xhepa

Laravel Splade, in this course Laravel Splade course is designed to teach you how to build modern, interactive web applications using Laravel with the power of Splade, combining the simplicity of Blade templates and the interactivity of SPA-like features without heavy JavaScript. In this course, we will learn how to install and configure Splade, set up navigation with smooth page transitions, and create dynamic forms with real-time validation. You will explore building advanced tables with search, filters, and sorting, integrating modals, tabs, and alerts to enhance user experience. We will also cover using Splade components for better UI, handling AJAX requests efficiently, and customizing views for specific needs. Additionally, youâ€™ll learn how Splade leverages Vue.js under the hood while keeping the development process Laravel-friendly. By the end of this course, you will be able to create responsive, interactive, and maintainable Laravel applications with ease using Splade. Tony Xhepa
