About the course Laravel reddit clone

Course Presenter : Tony Xhepa

Laravel reddit clone, in this course Laravel Reddit Clone course is designed to teach you how to build a fully functional social platform similar to Reddit using Laravel. In this course, we will learn how to set up authentication, user profiles, and community (subreddit) creation and management. You will explore creating posts with text or images, implementing a voting system (upvote/downvote), and adding threaded comments with nested replies. We will cover building sorting options like Hot, New, and Top, as well as implementing search functionality for posts and communities. You will learn to manage user roles and permissions, handle notifications for activity, and optimize performance with caching and eager loading. Additionally, we will work on pagination, securing routes with policies, and enhancing the user interface. By the end of the course, you will have a complete Reddit-style application built with Laravel, ready for deployment and customization. Tony Xhepa
