About the course Portfolio with laravel and vueJS

Course Presenter : Tony Xhepa

Portfolio with laravel and vueJS, in this course Portfolio with Laravel and VueJS course is designed to guide you in building a modern, dynamic portfolio website using Laravel for the backend and Vue.js for the frontend. In this course, we will learn how to set up Laravel and integrate Vue.js, design the database schema for storing project details, and create API endpoints to handle project data. You will explore building the frontend in Vue.js to display projects dynamically, implement categories and filters, and manage image uploads for showcasing your work. We will cover adding a contact form to receive messages, creating an authentication system for an admin panel, and building an admin dashboard to manage projects and site content. Additionally, you will learn how to optimize the portfolio for performance and SEO, and how to deploy it to production. By the end, you will have a fully functional, customizable portfolio website powered by Laravel and Vue.js. Tony Xhepa
